DETAILED ACTION

Receipt is acknowledged of the information disclosure statements filed 08/27/2007 and 10/02/2007. Two of the references could not be acknowledged. FR 8142M is not have a translation, and EPO 172 256 appears to be nonanalogous art dealing with machining.

Election/Restrictions

Applicant's election without traverse of Group I in the reply filed on 10/02/2007 is acknowledged.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 8 and 9 of U.S. Patent No. 7,070,800 (US'800). Although the conflicting claims are not identical, they are not patentably distinct from each other because US'800 claims tiotropium particles which are a mixture of coarse and finer particles, with coarse particles having a size of 15 to 80 um and finer particles having a size of 1 to 9 um (claim 1). Tiotropium derivatives may be chloride, bromide, iodide, methanesulphonate or para-toluenesulphonate (claim 2). The excipient may be monosaccharides, disaccharides, polysaccharides, polyalcohols (see claim 8). Specific saccharides used as excipients are listed at claim 9. As such, those of ordinary skill would have expected similar therapeutic results from the use of the instant tiotropium composition given the claims of US'800. The instant invention would have therefore been obvious at the time of invention given the claims of US'800.

US Patents 6,228,394 and 6,235,725 are cited as patents of interest.
